

GEAR UP TO MAXIMISE UPTIME

Extend the performance of your turbomachinery – and your business – with our world-class technical capabilities and solutions.

Tomorrow's success starts with today's operational resilience. Our turbomachinery solutions are designed to **future-proof your processes, reduce downtime risks, and enhance output efficiency**. Backed by decades of technical expertise and uncompromising standards, we empower your systems to deliver peak efficiency.

Leverage the **Exion Asia** advantage

On-Site Services

Rapid deployment of specialists to diagnose and resolve complex technical issues on-site, ensuring operational efficiency and minimal disruption.

Spares

Supply of OEM-recommended spare parts to support projects, ensuring quick turnaround and optimal equipment performance.

Field Engineering

Specialised support for power plants, oil & gas facilities, fertiliser plants, palm oil and sugar mills, delivered by OEM-trained field engineers.

Equipment Overhaul

Repair services that leverage our industry-leading facilities and authorised service centres, backed by ISO-accredited processes for quality assurance.

Upgrade Projects

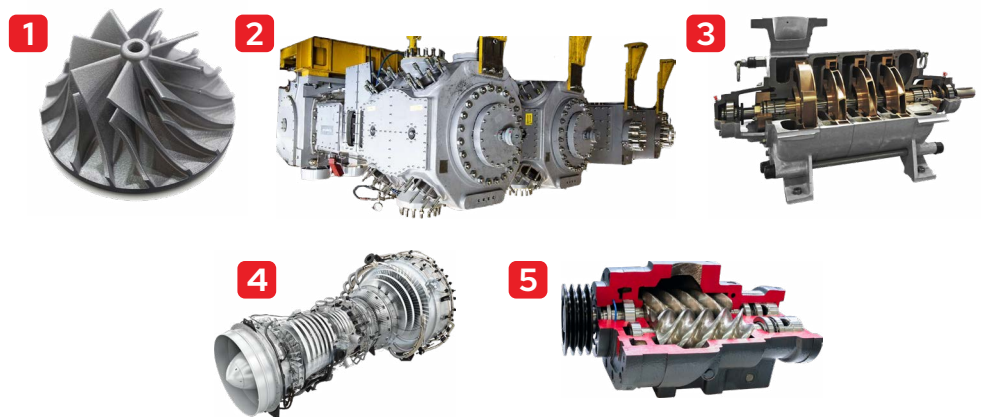

Enhancing equipment performance and efficiency through upgrades led by OEM-trained engineers.

TURBOMACHINERY EQUIPMENT

Our turbomachinery solutions are designed to meet the rigorous demands of modern industrial operations. From high-performance compressors and turbines to specialised pumps and expanders, every piece of equipment is precision-engineered for reliability and efficiency. Complemented by end-to-end services – including installation, maintenance, diagnostics and upgrades – we ensure that your equipment operates at peak performance throughout their lifecycle.

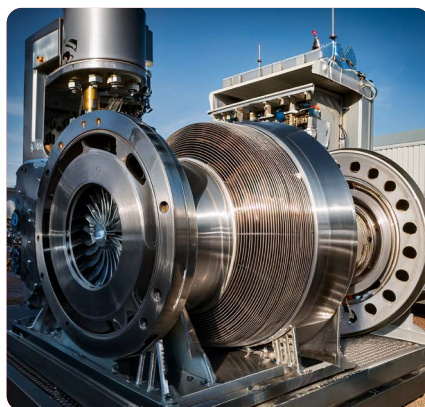

Maintenance of turbomachinery equipment

1. Compressor Impeller
2. Reciprocating Compressor
3. Centrifugal Compressor
4. Gas Turbine
5. Screw Compressor

Maintenance activities

1. Predictive maintenance on equipment
2. Field services activities to perform outages
3. Engineering analysis of turbomachinery equipment
4. Root cause failure analysis

RESOURCES & TOP OEM BRANDS

Resources

1. Field service capabilities
 - Network of highly qualified and experienced professionals
 - Trained with various OEM partners
2. Advanced repair and machining capabilities to meet stringent turnaround requirements
 - Up to 100-tonne overhead crane
 - Rotor balancing up to 30 tonnes
 - Extensive machining capabilities
3. Engineering support from various OEM partners to ensure quality work

Top OEM Brands

INNOVATE FOR SUCCESS WITH SWTS ASIA

SWTS Asia's group of companies specialises in Maintenance, Repairs & Overhauls (MRO) Services, Engineering Applications & Distribution of Engineered Products, Electrical Services and Consultancy to various industries; from maritime to energy solutions.

Supported by the latest technology, sophisticated tools and a dedicated team, we are committed to building long-term relationships with customers, manufacturers and business partners.

Together, we finish what we start – and go the extra mile.

We keep your plants and vessels running

Our regional footprint

We serve a wide range of industries – and ensure that we are always close to our clients, no matter where they are.
